

ETAMINE

PARIS

Songe d'été | Spring 2026

Parasols, kites, pavilions, sails, sunbathing, Breton stripes – the collection is inspired by the quintessential French stripe, a tender echo of childhood memories.

On whitewashed walls and raw stone flooring, the sun plays with the blossoms of an Etamine fabric, casting shadows that dance at the touch of the wind. Somewhere in Provence, the collection reveals the beauty of its natural materials and the rich chromatic world of its stripes and prints.

Like an artist's canvas, HEURE BLEUE paints the depth of an imaginary horizon, thanks to a digital printing technique on a European Flax-certified linen voile.

With FIL DU TEMPS and ESCALE, a solution-dyed acrylic in/outdoor weave creates a wide, open texture reminiscent of a fishing net, gently capturing the light, while FLEURS SAUVAGES storms onto the scene, straight from the shores of Lake Como.

Between nature's creation and the artist's hand – who is the true creator? Etamine steps beyond the frame, projecting its vision into an imaginary dimension where shapes and materials blur and fuse. A linen drape winds around garden furniture to highlight its structure, a woven stripe stretches into nature, fleeting and ephemeral, to create an illusion and reveal a gesture.

The spirit is light, poetic, and dreamlike. Under the last rays of the sun, fabrics in bloom come alive, and when night falls, a star appears above the olive groves – bearing the beautiful name Etamine.
